

APEGS Success Story: Transforming Ethics Training with Vocalmeet

OUTCOME

The partnership between APEGS and Vocalmeet has not only met the challenge of providing essential ethics training to engineers and geoscientists but has exceeded expectations. The success of the ethics courses and the increased engagement of APEGS members stand as a testament to the value of this collaboration.

THE CHALLENGE

When it comes to engineering and geoscience, ethics are at the core of responsible practice. Because of this, the Association of Professional Engineers and Geoscientists of Saskatchewan (APEGS) recognized the importance of providing its members with mandatory ethics training. However, they faced unique challenges: APEGS wanted one vendor to create video based courses, host them on a platform, and offer end user technical support to course takers. In addition, these courses would be offered free of charge to all members. With over 12,000 members, a robust platform was a must.

THE SOLUTION

In their quest to meet these challenges head-on, APEGS turned to Vocalmeet, a trusted name in Learning Management Systems (LMS) and client success. Vocalmeet's track record for providing intuitive and versatile LMS solutions made them the perfect choice for APEGS.

Vocalmeet worked hand-in-hand with APEGS to develop the courses and to host annual ethics modules, ensuring that this critical training was readily available to APEGS members free of charge. What sets Vocalmeet apart is not only their platform but also their commitment to offering Fully Managed Services. This comprehensive support package includes a dedicated project manager, course development team and technical

ABOUT VOCALMEET

Vocalmeet has earned its reputation by providing state-of-the-art technology, unparalleled project management and customer service, coupled with an unwavering commitment to the success of our clients. Our goal is to delight our customers every step of the way.

We understand the unique needs of today's associations & organizations and what it takes to be best in class.

ABOUT APEGS

APEGS, the Association of Professional Engineers and Geoscientists of Saskatchewan, oversees 15,000 engineering and geoscience professionals in line with The Engineering and Geoscience Professions Act.

Endowed by the government of Saskatchewan with the privilege and responsibility of self-regulation, APEGS sets admission standards, ensuring all engineering and geoscience work in the province is conducted by licensed individuals.

Committed to public safety, APEGS enforces ongoing professional development, investigates professional misconduct, and takes disciplinary action when necessary. The organization also actively prevents the unauthorized practice of engineering and geoscience, safeguarding the public and upholding the proper use of protected titles.

tsupport services. It provided APEGS with the peace of mind that Vocalmeet had their back.

One of the key achievements in this partnership was the development of the ethics course content. Vocalmeet's expertise came to the forefront as they advised APEGS on how to present information for peak clarity and introduced innovative methods for data presentation. Importantly, Vocalmeet offered APEGS a range of development options, ensuring that the chosen plan aligned with both budget and specific needs. This flexibility allowed APEGS to deliver high-quality training to its members.

THE RESULTS

The impact of the collaboration has been transformative. With the high scalability and ease of use of the Learning Management System, APEGS can continuously offer this essential course content to its members each year. Not only this: members continue to be satisfied with the quality of the course material and overall experience offered by the Vocalmeet team.

The true success of Vocalmeet's involvement was in enabling APEGS to focus on its core mission of upholding ethical standards within the engineering and geoscience community. Vocalmeet took care of the technical and administrative aspects of developing and delivering the ethics training program.
